

Preflight checklist

- ✦ Phantom & R/C battery charged
- ✦ iPad charged

- ✦ Propellers installed and tightened
- ✦ Remove gimbal lock
- ✦ Gimbal not obstructed (grass)
- ✦ iPad volume to MAX
- ✦ iPad to R/C cable attached
- ✦ iPad Wifi & BT **OFF**
- ✦ R/C **ON**
- ✦ R/C in **P-Mode**
- ✦ Phantom **ON**
- ✦ Launch DJI Pilot app

Check values :

- ✦ Compass status
 - ✦ IMU values (0, 1, 1400-1600)
 - ✦ Gain values
 - ✦ Max height
 - ✦ RTH height (depends on flight location)
 - ✦ R/C EXP & Gain (0,5-0,4-0,5)
 - ✦ VPS ON (if indoor flight)
 - ✦ Satellite status
-
- ✦ Format SD card
 - ✦ **CHECK HOME POINT**

Takeoff

Hover 30 seconds & check stability

Normal		
   	Red, Green and Yellow Flash Alternately	Turning On and Self Diagnostic Testing
	Green and Yellow Flash Alternately	Warming Up
	Green Flashes Slowly	Safe to Fly (P-mode with GPS and Vision Positioning)
 X2	Green Flashes Twice	Safe to Fly (P-mode with Vision Positioning but without GPS)
	Yellow Flashes Slowly	Safe to Fly (A-mode but No GPS and Vision Positioning)
Warning		
	Fast Yellow Flashing	Remote Controller's Signal Lost
	Slow Red Flashing	Low Battery Warning
	Fast Red Flashing	Critical Battery Warning
