Hello!
How to force drone to update firmware from SD card?
On Pro/Adv/Std this can be done by creating xxx_FW_DEBUG file. But here it seems to not work.
Or I do something wrong?

I always did mine with OTG cable adapter from device into drone,I do this with p3s , p4s and p34k before I give it away,,always worked,,no nothing of other way so this how I've been doing it over the years,,I did p4s 2 days ago like this and works every time,thankfully,,you could try this from dji susan...this for p34k,,,

Tom

What mobile device you're using to upgrade it?
Please turn off remote, press C1+C2+ Record+ Camera settings dial at the same time, then turn on remote, you will see the light blue led, then run the APP and try to upgrade it again.
