

You're responsible to use your unmanned aircraft safely and legally

Always:

- Fly during daylight and in good weather (not in clouds or fog).
- Keep your aircraft in sight where you can see it with your own eyes.
- Make sure your aircraft is safe for flight before take-off.
- Know if you need permission to fly and when to apply for a Special Flight Operations Certificate.
- Respect the privacy of others – avoid flying over private property or taking photos or videos without permission.

Do not fly:

- Closer than 9 km from an airport, heliport, or aerodrome.
- Higher than 90 metres.
- Closer than 150 metres from people, animals, buildings, structures, or vehicles.
- In populated areas near large groups of people – such as beaches, sporting events, outdoor concerts, festivals, or firework shows.
- Near moving vehicles – avoid highways, bridges, busy streets or anywhere you could endanger or distract drivers.
- Within restricted airspace, including near or over military bases, prisons, and forest fires.
- Anywhere you may interfere with first responders.
